

HOBBY PRESENTS NEW LAYOUTS & NEW REAR DESIGN

In the 2020 season, Hobby will continue to focus on six existing model ranges with 58 different model variants. The primary focus this year is on intelligent space solutions combined with a cosy ambience. With the 560 FC and 720 WQC, Hobby is presenting two new, attractive layouts in the PRESTIGE model range, which perfectly reflect these qualities. Furthermore, all Hobby caravans, with the exception of the PREMIUM model range, will feature the same rear design as the PRESTIGE model launched last year.

Hobby caravans are characterised by a tremendous feeling of space combined with a cosy ambience. In the 2020 season, the focus will be on intelligent space solutions offering ample room and a cosy atmosphere. The two new layouts in the popular PRESTIGE model range, the 560 FC and 720 WQC, perfectly complement the existing layouts. They are stylishly furnished and offer plenty of space to stretch out and relax in. With an overall length of 7,513 mm, the 560 FC is equipped with a double bed and adjoining washroom with a separate shower. The 720 WQC layout, however, is 9,042 mm in length. The tandem-axle vehicle features a large, pull-out queen-size bed in the comfortable sleeping compartment and a spacious en-suite bathroom at the rear with a separate shower.

The two layouts also feature a large L-shaped kitchen with plenty of room for cooking meals and stowing away supplies. The 150-litre Super Slim Tower refrigerator has ample room for all the essential provisions. The huge couch seating area at the rear of the vehicle, which can seat up to eight people, is especially cosy.

Another highlight is the heated coat rack in the entrance area, which provides you with somewhere to store and dry your dirty and damp clothes as soon as you enter the vehicle. An optional ALDE underfloor heating system for the 720 WQC will ensure your caravan is lovely and warm.

Thanks to the tried-and-tested “HobbyKomplett” ALL-INCLUSIVE package, both caravans come with a comprehensive range of equipment as standard – without any annoying extra costs. “With the PRESTIGE 560 FC and 720 WQC, we have created two extremely cosy layouts that are perfectly tailored to requirements and provide plenty of storage space. We are confident that they will go down very well with our customers, too,” says Dirk Gottwald, Head of Caravan Design.

The Hobby Ontour, De Luxe, De Luxe Edition and Excellent model ranges will feature the new rear design you will recognise from the PRESTIGE model. As a result of this change, all of the model ranges, with the exception of the Premium model range, will look identical from the rear. The stylish design provides them with a modern and dynamic appearance.
